GigaCore
ETHERNET SWITCHES

RELEASE NOTES GIGACORE 2.8.2

DOCUMENT INFORMATION

This document lists the new features and bugfixes available in the new GigaCore firmware.

NEW

- Added legacy setting as workaround in combination with some non Avnu/Milan certified components.

BUG FIXES

- Fix possible Out Of Sync issue on PtPv2 or gPtP ports.
- Power PoE ports even when invalid PoE signature. Fault will be indicated in the PoE page as a status to warn the user.
- Extended SFP info for Araneo API.
